

Chapter 11

Gods wants mankind to understand, there is no conspiracy to tell mankind one thing and do something else, mankind must understand that what god is trying to tell you is what will be. Ok we understand how it must sound that extraterrestrials will be coming to your planet and take control over everything that your doing, but what god wants you to know is that beings from other planet will come to your planet, this is not a threat it is reality, this will be, what god wants mankind to understand is that they are gods creators as well, it is hard for mankind to understand that they were not gods only creation, god is universal, god did not only create earth, but many planets, all laying in the universe. The universe is large, larger then mankind understands, there are vast arrays of planets, moons, suns, all in gods universe. Mankind will accept new ideas, as new ideas come to them, this is the same concept of beings from other planets, they will come to mankind when mankind witness them coming. Mankind must not feel threatened by these beings for they are all apart of the fabric that makes up the universe, gods universe.

Lets talk a little about mankind now, it is important that mankind understands what is happening to it. This is not only your creation, your problem, this is a problem that god say after your creation, god say that there was a problem, that mankind wanted more, more of everything, in the beginning god looked the other way, allowing what mankind did to happen, but the centuries went by and mankind did not get tired of having more, in fact they grew even more determined to have more. Mankind look inside of yourselves, see what we are talking about, see your own need to have more, more of everything, more money, more health, more of god. Your never satisfied with what god has given you, this is not all bad, but mankind must be made to recognize this of themselves. God gives you things, all the time, but man stops and asks is this all, instead of being satisfied with what god has given you, what he has bestowed upon you. Look around and see all that you have, no mater how big or how little it is, you must see that yes you earned some of it, but all of it was given freely by god to you, ask for his forgiveness for being so greedy.

God is showing you signs, we have spoken of this many times, it is important to understand what kind of signs is god sending you, well he is telling you that the end is near, you can see this by looking at the newspaper, watching the news, seeing a movie, you can see for yourself the violence that is escalating. This escalation is not of gods doing, but mankind, mankind will learn that with wars and violence all forms of violence will escalate, not only in those countries waging wars, but others near, around or even on other sides of the planet. This is a part of cause and effect, what happens in one place has a profound effect on other places. There are other signs that god is sending you, less visible signs, signs of love, compassion, understanding. These like violence have a profound effect on your planet, for they counter what the violence is doing, like a large pendulum swinging back and forth, violence swings the pendulum in one direction, compassion, love, acceptance, swing the pendulum back in the other direction. One day in the future the pendulum will remain constant, this will be a time of peace, and love throughout your planet. This is how the universe is calling you to be, that violence and

hate will be a thing of the past, that the future will be full of love, peace and understanding, but much will have to be done before this will happen, mankind will have to accept things that it has no control over, when mankind understands that the only force, the only power in the universe is god.

God is showing mankind many signs more of the signs are that mankind can not or will not be able to predict what will happen, with god, there are many that claim to be able to tell you when time will end, this is simply not so. God is the only one who knows when time will end, it is certain that it is not up to mankind to make the determination as to this time, no matter how many people claims so, they will never know. God is telling mankind that the end is near, this does not mean that it will be tomorrow, or the next, for it is not up to us to make that determination, it is god who will make that determination. What we do know is that there are many factors that are out of gods hands, this is not because he has no control over them, but god will not intervene, just as god has not intervened in a lot of events that have happened in human existence, this does not mean that he is not aware of the events, but these events are of mankind's making and as such, god will not intervene. God continues to show you two paths, paths that you have the ability to follow, one is a path with God and his son Jesus Christ leading to heaven, the other path is full of destruction, violence, death, leading to the end of time, both paths will eventually lead to the end of time, but gods path is much less full of hate, despair, death then the other path, it is up to mankind to make the determination as to which path you will follow, one person cannot make the difference, but many together can help bring mankind to the right path, follow your heart, lead yourself and others to the right path, gods path.
