Chapter Three

It is important for mankind to realize that God has plans for them, these plans are for mankind to follow Gods rules, and Gods laws. People must accept that there is a God, that he is the God of the universe, that more then just mankind pays respect to God, that others on other planets pay homage to him. There is only one God, he is the creator of the universe, he created mankind, he has created other beings, in other worlds, Mankind must feel honored that God would include them, to accept them, for few do. When we speak of few, we mean very few, for mankind has been so destructive in the treatment of themselves, others, and most of all their planet. God has told you over, and over that you must respect yourselves, others, and your planet. God shows you that in the future things will happen that will make all clear, that they are not alone in the universe, that Gods creations on other planets are watching you, checking on you, for they question how much pain you can endure. God wants only the best for all his creations, not just mankind, but others, there is nothing wrong with wanting the best for yourself, this does not imply that you do not honor God, for God understand this, this is why God created these things, only mankind found that some things were illegal, God created all things to be enjoyed, only mankind would find something evil to make out of what God had created.

I think it is time for us to talk a little about evil, mankind has been taught that there is a devil, that this devil is the devil because he was forced out of heaven for attempting to become God. This is not so, there has never been anyone, or anything that has attempted to take Gods place, for all know that God is God, God knows all things, so how could this be. We understand what mankind has been taught, there is nothing wrong with attempting to scare people into submission, but you must understand the truth. The truth is that there is evil, there has always been evil, but this evil comes from mankind, not from other worlds, God understands this need for mankind to be controlled by other, by religions, by faiths, but what God wants mankind to understand is that God has given us everything we need, everything, air, life, water, food, things of enjoyment, but that mankind unlike others has not realized that these are of Gods doings, not mankind. Mankind must understand that God does not expect you to honor him, by sacrificing everything you have , or by turning from things you enjoy, what God want mankind to understand is that there are only a few things that God expects from his people. they must include him in their life, this means talking with him daily, this means when you see something of enjoyment, let God know this makes you happy, God expects you not to kill for God is the only one who can decide who, what, when, and why should die. You should love yourselves, you should love others, Another

one of Gods rules is that you watch out for the sick, this means to take care of them, help them. provide food, and substances, when they need it. Another one is to watch out for the poor, this does not mean you have to provide them a place to stay in your home, but it does mean you should offer them a place to stay in you house, you should offer them a job, you should help them if they have children. There are many things that you all know you could do, and should do, but what God is telling you is you must do. there is only one God, God creator of the universe, you should put no one above God. You should pay homage to him, you should convert to him, this is done by raising your head to the sky, and asking God to forgive you for all the things that you have done. This is all God is asking of his people, mankind must learn to talk with God, tell them of their love for him, include them in their lives, make God a part of your life, God has given mankind so much to be thankful for is it not time to do so, but what God is telling you is you must do so.

God is showings man sings of the future, mankind must relies that the end is near, that all must convert if they wish to be with God. God shows all what the future holds, a future full of war, hate, killings, disease, and death. God continues to show you these signs not because you must come with him, but because he wants you to come with him, that God wants only the best for his children, that fighting, and wars have only brought destruction of your planet, that God tells you so that you will listen to him, stop the wars, stop the killing, love one another. People have asked why would God allow these things to happen to mankind, but God does not allow this, mankind allows this, God has chosen not to intercede on your behalf, because mankind must learn their lesson from all of this. In heaven the angels, and other have to learn lessons, just as mankind must learn lessons, in heaven angels work on day to day running of heaven, but they also must learn lessons from their past life, see even in heaven you must learn your lessons. God does this for all, it is called life, a progression from one plain to the other plain.

God does not expect mankind to understand the running of heaven, or the existence of other plains, or the truth of people coming back to earth, but God does not tell you this looking for acceptance, for God is telling you this so that you will understand, your not alone, that you should be looking out for the others that surround you, listen to what the angels, the spirits are telling you to do, follow there guides for what they are showing you is what God wanting you to do. Prayers are answered all the time from mankind, does mankind think these prayers are being answered by who? God answers these prayers, God sends his messengers, and sometimes God comes to visit you, you should all be pleased that your God would do this for you, for all beings in all universe listen when God speaks. Continue to pray to God, continue to listen to his messengers, continue to look to the future, it is of your choice, will it be a future full of life, and love, and happiness, or will it be a future, full or war, death, and destruction? God loves you all, and wants only the best fro you, praise your God at this time.

I think that we should tell something about what is mankind. Mankind is made of molecules, DNA, protein, particles, but mankind is made of so much more, there is a spirit, this spirit is used in the place of a body, it is used to communicate with God, it is used when one passes away, and crosses over, it is to communicate with others, the spirit is used to find courage within yourself, it is used to commune with one you love, it is used for many reason, but the most important of all uses is to communicate with God. God shows man that they have a spirit, at birth men, and women are given three things physical, body, mind, spirit, this is what God gives to man. Man has been given these things by God because God loves you that much, God has shown man that, and so much more, that to

use the spirit, takes time, some men never learn how to use their soul to communicate with God, others find the use only when facing death. The soul is a useful part of ones life, for with it comes a responsibility not to use the soul for the wrong reason, did you know that people can use their soul for the wrong reason, that some find other uses for it, such as hate, scare, and yes even death. God is displeased by other uses then what he has told mankind to use it for.

I feel that we should spend some more time on the devil, I think it is important for mankind to understand that there is evil, that evil is around all at any time, but that does not mean you should be scared of evil, for what evil is, is uneducated, evil feeds on negative, everything has negative, but when there is more negative around then positive energy, this is where evil forces get their energy from. It is important for mankind to relies there is no devil, the devil is made for what the devil represents, negative, God is of the light, he is surrounded by the light of his love for the universe, that through this light all are whole, and clean. That nothing evil can enter Gods loving light. That is why it is important to ask those around you, do you believe in God?, if they say yes, they are good spirits, if they say no, or refuse to answer then they are negative, and should be told to leave your home, leave your, or others. You must not become negative for this only gives them more power, show them your light, the light from God, spread the light to them, tell them to enter Gods loving light, or leave Gods loving light, ask for forgiveness for yourself, and for them. Evil is evil because no one has ever done good to them, show them your love for God, spread your love for God to them.

It is important for mankind to understand that all is a cause, and effect, that there is positive energy - God, and negative energy - evil, that all is here for a reason, what we attempt to do is show mankind that positive is needed, more then negative, that mankind has created his own negative world, a world full of destruction, wars, hate, pain, suffering. God wants things for his planet, he wants things of beauty, happiness, joy, love for these things are more important than negative. It is important for mankind to understand that there are people, who feed on negative, these people, unless they change their way, will become evil, here, and forever. do you understand the importance of positive thinking, positive actions, positive people, all of mankind has evil in them, it is a part of what makes mankind, negative, and positive, this is what feeds evil. Mankind must learn to think positive, be positive, show positive. Some feel that this is all smoke, and mirrors, but God has told mankind this since creation, that God has shown mankind this throughout time. By showing God your love for him, you are spreading hope, and love, throughout this negative planet, so in actuality your spreading a positive energy throughout your world, and mankind the negative forces weaker. There is no battle between the negative, and positive world, for both are needed, God understands this, and accepts this mankind must learn to accept it. That being said, negative should not be allowed to take over ones life, they should not be allowed to live with you, for they are negative, and can cause harm, but there are places for negative to co-exist, just not with Gods children.
